

## Datasheet for

## Bencon Concrete Glue

### Description:

Bencon Concrete Glue is a pure PVA product with a solid content of 56%. Bencon Concrete Glue is specifically manufactured for the concrete industry as an adhesive for light concrete production, repairment of concrete and production of top layer for concrete flooring.

### Usage:

Bencon Concrete Glue is for polishing different categories of concrete

When using Bencon Concrete Glue tensile strength, abrasion resistance and adhesion ability is increased, while cracks are avoided.

### Dosage:

Approx. 10 kg. of Bencon Concrete Glue is used per 50 kg of concrete, when polishing half the dosage.

For whitewashing, i.e., for a church, mix 1 parts Bencon Concrete Glue to 10 parts water.

Bear in mind: layers should be cleaned thoroughly and all loose materials should be removed. The layer is rinsed thoroughly, though at the start of the process, there must not be any water present.

### Cleaning:

Tools are cleaned with water.

### Physical properties:

Appearance :	milky-white
Odour :	weak
Texture :	thick liquid
Density :	1,1 g/ml
Solid content:	56%
