

## Datasheet for

## Screen wash

### Description:

**Screen wash** is consisting of Ethanol and Isopropyl alcohol.

### Usage:

**Screen wash** is a cleaning agent for windshields and headlights, while being a frost-proofing agent for the sprinkler system of the car.

### Advantages:

**Screen wash** cleans the windshield efficiently of dirt and road filth.

**Screen wash** frost proofs the sprinkler system down to -21°C

**Screen wash** do not damage the car's paint and can be used year-round.

**Screen wash** is mixed ready-to-use in the winter.

### Limitations:

In the sprinkler system's container the product will start to form ice crystals at approx. -15°C.

While driving the windshield will be cooled down further, due to alcohol evaporation because of the powerful air circulation. Because of this it is possible that screen wash will freeze, even if the temperature is above -15°C.
